

## LEADING POSSIBILITY

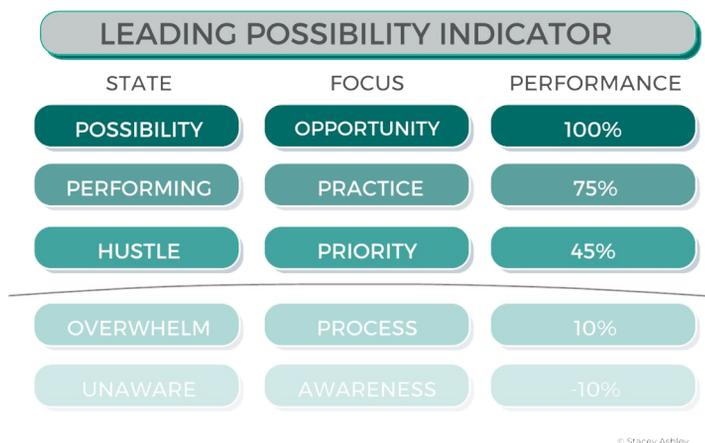

# Executive & Leadership Coaching

In this VUCA world, leaders must navigate the complexities of globalization, technological advancement, social interconnectivity, massively accelerating change and a multi-generational workforce.

An [Egon Zendor report in May 2017](#) found that for those in VP roles and above it takes most people 6 months or longer to make an impact in their roles, and for CEO's it can be much longer. And according to the *Harvard Business Review*, at least 2 out of 5 new CEOs fail in their first 18 months on the job. While Executives who get the right support get up to speed in about half the time and continue to perform.

In order for leaders to inspire, influence and engage their teams so they can perform and deliver in a world of change, they must develop their practice of leadership.

- Do you want to grow your senior leadership talent pipeline?
- Do you want your newly promoted leaders to transition quickly to their new portfolio, be performing effectively and adding value as soon as possible?
- Do you want your leaders to develop executive presence, strategic thinking, and influencing skills?
- Do you want your leaders to build more engaged, higher performing teams and future leaders?
- Do you need your leaders equipped to proactively lead and inspire change?

*I worked with Stacey over a six-month period to explore alternative pathways to problem-solving and people management within my business.*

*Stacey was an expert guide to help me consider a variety of solutions which were not automatically top of mind. I found the process extremely enlightening,*

*Stacey has a deep appreciation of business management which resulted in our conversations often extending beyond the scope of what I expected.*

*I am deeply appreciative of her empathetic and collaborative style and would not hesitate to undertake further coaching with her in the future.*

**Mike Baard, Managing Director Australasia NBC Universal**

When I'm working with aspirational leaders, I commonly find they want and need help to develop the following key areas:

- Strategies to elevate their leadership practice, ensuring balanced focus on self, team and the organisation.
- Understanding of others and insight into their behaviour.
- Creating the time and space to lead.
- Developing strategies to face into essential conversations with confidence
- Developing executive presence and influence.
- Proactively moving from reactive to strategic leader.
- Developing strategies for enhancing team and stakeholder relationships and management.
- Developing team to step up and become more accountable, utilising more of a coaching approach.
- Enhancing approaches to leading behavioural change, identifying opportunities for raising impact, traction and best practice implementation.

Plus much more
